

I am a new XM listener. I enjoy the variety XM radio offers, however I still listen to regular radio on the car dial and at home on my home receiver. I PAY FOR THESE XM SERVICES and feel it is important to protect my right to do so. If I choose to have cable or satellite, I would do so as well. I see no difference here whatsoever between paying for XM, or paying for cable or dish for television. I still watch the regular channels on my television, as well as what cable or dish has to offer.

The programming on so called free radio and tv is terrible! That is one of the reasons I am listening more to XM Radio. The so called free stations should be learning from satellite tv and radio and adjusting their programming to meet the needs of their listeners and not just trying to control the air waves with what they think we need to be listening too and watching.

I ENJOY HAVING A CHOICE. I feel America is based on democracy, AND THE PEOPLE HAVING A CHOICE in what they want in their daily lives.

By protesting and petitioning to censor the traffic and weather broadcasting by XM, the NAB smacks of censorship and CONTROL of what America's people have A CHOICE to listen to.

I will contact the proper persons to record my opinion.

Thanks for your serious consideration of my feelings and opinions.
